Forward Looking Statements

This quarterly report on Form 10-Q ("Form 10-Q") contains statements that, to the extent they are not recitations of historical fact, constitute "forward looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act"), and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). All such statements are intended to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995 and includes this statement for purposes of such safe harbor provisions.

"Forward-looking" statements, as such term is defined by the Securities Exchange Commission (the "SEC") in its rules, regulations and releases, represent our expectations or beliefs, including, but not limited to, statements concerning our operations, economic performance, financial condition, the impact of widespread health developments, such as the ongoing COVID-19 outbreak, and the governmental, commercial, consumer and other responses thereto, growth and acquisition strategies, investments and future operational plans. Without limiting the generality of the foregoing, words such as "may," "will," "expect," "believe," "anticipate," "intend," "forecast," "seek," "plan," "predict," "project," "could," "estimate," "might," "continue," "seeking" or the negative or other variations thereof or comparable terminology are intended to identify forward-looking statements. These statements, by their nature, involve substantial risks and uncertainties, certain of which are beyond our control, and actual results may differ materially depending on a variety of important factors, including, but not limited to, those identified elsewhere in this document, including in Item 1A, Risk Factors, Item 2, Management's Discussion and Analysis of Financial Condition and Results of Operations, and Item 3, Quantitative and Qualitative Disclosures About Market Risk, as well as with respect to the risks described in Item 1A, Risk Factors, to our Annual Report on Form 10-K for the fiscal year ended December 31, 2019 filed with the U.S. Securities and Exchange Commission ("SEC") on March 9, 2020 ("2019 Form 10-K). All forward-looking statements made herein are qualified by these cautionary statements and risk factors and there can be no assurance that the actual results, events or developments referenced herein will occur or be realized.

Readers are cautioned not to place undue reliance on these forward looking-statements, which reflect management's analysis only as of the date hereof. The Company undertakes no obligation to publicly revise these forward-looking statements to reflect events or circumstances that occur or arise after the date hereof.

Table of Contents

(1) Basis of Presentation

Our accompanying unaudited consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles ("U.S. GAAP") for interim financial information and in accordance with the instructions to SEC Form 10-Q and Article 10 of SEC Regulation S-X. Therefore, such financial statements do not include all of the information and footnotes required by U.S. GAAP for complete financial statements and should be read in conjunction with the consolidated financial statements and footnotes thereto included in our 2019 Form 10-K. In our opinion, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three months ended March 31, 2020 are not necessarily indicative of the results that may be expected for the fiscal year ending December 31, 2020.

The preparation of financial statements in conformity with U.S. GAAP requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Significant estimates affecting the financial statements include accruals for contract disallowance reserves, award fee revenues, costs to complete on fixed price contracts, recoverability of goodwill and intangible assets, and earn-out obligations.

Coronavirus (COVID-19) Pandemic

On March 11, 2020, the World Health Organization declared the outbreak of the novel coronavirus disease, known as COVID-19, as a global pandemic. The pandemic and the containment and mitigation efforts by governments to attempt to control its spread created uncertainties and disruptions in the economic and financial markets. The impact of COVID-19 on us is evolving and its future effects are highly uncertain and unpredictable. We are closely monitoring the effects and risks of COVID-19 to assess its impact on our business, financial condition and results of operations. In April 2020, we completed a cost reduction plan which included a reduction in workforce. We maintain a robust continuity plan to adequately respond to situations such as the COVID-19 pandemic, including a framework for remote work arrangements, in order to effectively maintain operations, including financial reporting systems, internal controls over financial reporting and disclosure controls and procedures.

Reclassifications

Certain reclassifications have been made to the prior periods' financial information in order to conform to the current period's presentation which include reclassification of products and services revenue and the renaming of our three operating segments as further described in Note (8) "Business Segments and Customer Information." These reclassifications had no effect on the reported results of operations.

Recently Adopted Accounting Pronouncements

In August 2018, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2018-13, Disclosure Framework-Changes to the Disclosure Requirements for Fair Value Measurement, which eliminates certain disclosures related to transfers and the valuation process, modifies disclosures for investments that are valued based on net asset value, clarifies the measurement uncertainty disclosure, and requires additional disclosures for Level 3 fair value measurements. The new standard is effective for fiscal years beginning after December 15, 2019 with early adoption permitted. We adopted ASU 2018-13 in the first quarter of 2020. The adoption had no impact on our consolidated financial position, results of operations or cash flows.

In August 2018, the FASB issued ASU No. 2018-15, Customer's Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That Is a Service Contract, which clarifies the accounting for implementation costs in cloud computing arrangements. The new standard is effective for fiscal years beginning after December 15, 2019 with early adoption permitted. We adopted ASU 2018-15 in the first quarter of 2020 and applied the standard prospectively. The adoption did not have a material impact on our consolidated financial position, results of operations or cash flows.

In June 2016, the FASB issued ASU No. 2016-13, Measurement of Credit Losses on Financial Instruments, which changes the methodology for measuring credit losses on financial instruments and certain other instruments, including trade receivables and contract assets. The new standard replaces the current incurred loss model for measurement of credit losses on financial assets with a forward-looking expected loss model based on historical experience, current conditions, and reasonable and supportable forecasts. The new standard is effective for reporting periods beginning after December 15, 2019. We adopted the standard in the first quarter of 2020 using the modified-retrospective approach, which requires the standard to be applied on a prospective basis with a cumulative-

Table of Contents

effect adjustment to retained earnings as of the beginning of the period in which the guidance is effective. Upon adoption, we did not record an adjustment to opening retained earnings as of January 1, 2020 as the standard did not have a material impact on our consolidated allowance for credit losses. The standard did not have a significant impact on our financial position, results of operations or cash flows.

(2) Acquisition

On January 10, 2019, our wholly owned subsidiary VSE Aviation, Inc. ("VSE Aviation") acquired 100% of the equity of 1st Choice Aerospace Inc. ("1st Choice Aerospace"), a provider of maintenance, repair and overhaul ("MRO") services and products for new generation and legacy commercial aircraft. 1st Choice Aerospace has operations in Florida and Kentucky. We retained key members of 1st Choice Aerospace's management team under three-year employment contracts with five-year non-compete covenants.

We may be required to make earn-out payments of up to \$40 million if 1st Choice Aerospace meets certain financial targets during 2019 and 2020. In January 2020, after obtaining the sellers' consent to our proposed amount of the earn-out payment for the 2019 performance year, we made a payment of approximately \$31.7 million to satisfy the 2019 performance year obligation. Included in earn-out obligation on our March 31, 2020 balance sheet is approximately \$5.3 million classified as the current portion of earn-out obligation, which represents our best estimate of the present value of such earn-out obligation for the 2020 performance year. Changes in the fair value of the earn-out obligations are recognized in earnings in the period of change through settlement.

(3) Divestiture

On January 28, 2020 VSE's subsidiary VSE Aviation, Inc. entered into two definitive agreements to sell (1) Prime Turbines LLC ("Prime Turbines") for a sale price of \$20.7 million and (2) certain related inventory assets for \$8.5 million to PTB Holdings USA, LLC ("PTB"). The transaction was completed on February 26, 2020 with cash proceeds of \$20.7 million, subject to working capital adjustments, and a note receivable of \$8.5 million received as consideration.

Prime Turbines is a provider of turboprop aircraft engine repair, maintenance and overhaul, including for Pratt & Whitney Canada PT6A and PT6T series engines. Prime Turbines was included in our Aviation segment.

The divestiture of Prime Turbines will not have a material impact on the Company's operations and financial results, and therefore does not qualify for reporting as a discontinued operation.

As a result of the sale of the business and inventory, the Company derecognized the assets and liabilities of Prime Turbines and recorded a\$7.5 million non-cash loss during the three months ended March 31, 2020 which is reflected as loss on sale of a business entity and certain assets in the consolidated statements of income. Additionally, a note receivable from PTB of \$6.0 million and \$1.5 million as of March 31, 2020 is included in other assets, and other current assets in our consolidated balance sheets, respectively, which represents the present value of the consideration to be received with an imputed interest rate discount.

(4) Revenue

Disaggregated Revenue

Our revenues are derived from contract services performed for the United States Department of Defense ("DoD") agencies or federal civilian agencies and from the delivery of products to our customers. Our customers also include various other government agencies and commercial clients.

Table of Contents

A summary of revenues for our operating segments by customer for the three months endedMarch 31, 2020 are as follows (in thousands):

				Federal and					
	Aviation		Fleet		Defense		Total		
DoD	\$		\$	4,567	\$	59,567	\$	64,134	
Other government		30		39,815		6,145		45,990	
Commercial		58,050		8,822		422		67,294	
	\$	58,080	\$	53,204	\$	66,134	\$	177,418	

A summary of revenues for our operating segments by customer for the three months ended March 31, 2019 are as follows (in thousands):

			Federal and					
	Aviatio	Aviation		Fleet		Defense		Total
DoD	\$	895	\$	4,842	\$	56,964	\$	62,701
Other government		_		42,882		10,777		53,659
Commercial	4	8,475		3,980		1,104		53,559
	\$ 4	9,370	\$	51,704	\$	68,845	\$	169,919

We changed our disaggregated revenue presentation by type below to better align with our operating segments. Revenues from our Aviation and Fleet segment are derived from repair and distribution services primarily through shorter term purchase orders from customers. Our Federal and Defense segment's revenue results from services provided on longer term contracts, including cost plus, fixed price and time and materials contract types. This change provides a clearer picture of the nature of each segment's contractual arrangements, how revenues derived from those contracts are affected by economic factors, and underlying performance trends impacting each segment. Additionally, the presentation is more in-line with how each segments' results are evaluated by our Chief Executive Officer in deciding how to allocate resources and evaluate performance.

The change in disaggregated revenue presentation did not result in any changes in our reported segments and had no effect on the reported results of operations.

A summary of revenues by type and operating segment for the three months endedMarch 31, 2020 is as follows (in thousands):

			Federal and					
	Av	iation		Fleet		Defense		Total
Repair	\$	32,808	\$	_	\$	_	\$	32,808

Total	\$ 49,370	\$	51,704	\$	68,845	\$	169,919

Contract Balances

Billed receivables, unbilled receivables (contract assets), and contract liabilities are the results of revenue recognition, customer billing, and timing of payment receipts. Billed receivables, net, represent unconditional rights to consideration under the terms of the contract and include amounts billed and currently due from our customers. Unbilled receivables represent our right to consideration in exchange for goods or services that we have transferred to the customer prior to us having the right to payment for such goods or services. Contract liabilities are recorded when customers remit contractual cash payments in advance of us satisfying related performance obligations under contractual arrangements, including those with performance obligations to be satisfied over a period of time.

We present our unbilled receivables and contract liabilities on a contract-by-contract basis. If a contract liability exists, it is netted against the unbilled receivables balance for that contract. Unbilled receivables decreased from \$46.3 million at December 31, 2019 to \$43.9 million at March 31, 2020, primarily due to the billing of our customers in excess of revenue recognized as performance obligations were satisfied. Contract liabilities, which are included in accrued expenses and other current liabilities in our consolidated balance sheet, decreased from \$5.0 million at December 31, 2019 to \$4.5 million at March 31, 2020, primarily due to revenue recognized in excess of advance payments received. For the three months ended March 31, 2020 and March 31, 2019, we recognized revenue that was previously included in the beginning balance of contract liabilities of \$700 thousand and \$1.5 million, respectively.

Performance Obligations

Our performance obligations are satisfied either at a point in time or over time as work progresses. The majority of our revenue recognized at a point in time is for the sale of vehicle and aircraft parts in our Fleet and Aviation segments. Revenues from products and services transferred to customers at a point in time accounted for approximately 43% of our revenues for the three months endedMarch 31, 2020 and March 31, 2019. Revenues from products and services transferred to customers over time accounted for approximately 57% of our revenues for the three months endedMarch 31, 2020 and March 31, 2019, primarily related to revenues in our Federal and Defense segment and MRO services in our Aviation segment.

As of March 31, 2020, the aggregate amount of transaction prices allocated to unsatisfied or partially unsatisfied performance obligations was\$201 million. Performance obligations expected to be satisfied within one year and greater than one year are 97% and 3%, respectively. We have applied the practical expedient for certain parts sales and MRO services to exclude the amount of remaining performance obligations for (i) contracts with an original expected term of one year or less or (ii) contracts for which we recognize revenue in proportion to the amount we have the right to invoice for services performed.

During the three months ended March 31, 2020 and March 31, 2019, revenue recognized from performance obligations satisfied in prior periods was not material.

Table of Contents

(5) Debt

Long-term debt consisted of the following (in thousands):

	March 31,	Γ	December 31,	
	2020	2019		
Bank credit facility - term loan	\$ 102,050	\$	120,800	
Bank credit facility - revolver loans	174,206		152,000	
Principal amount of long-term debt	276,256		272,800	
Less debt issuance costs	(2,556)		(2,789)	
Total long-term debt	273,700		270,011	
Less current portion	(17,820)		(16,883)	
Long-term debt, less current portion	\$ 255,880	\$	253,128	

We have a loan agreement with a group of banks to provide working capital support, letters of credit and to finance acquisitions. The loan agreement, which was amended in November 2019 and expires in January 2023, comprises a term loan facility and a revolving loan facility. The revolving loan facility provides for revolving loans and letters of credit. Financing costs associated with the loan agreement amendment of approximately \$1.5 million were capitalized and are being amortized over the five-year life of the loan. The fair value of outstanding debt as of March 31, 2020 under our bank loan facilities approximates its carrying value using Level 2 inputs based on market data on companies with a corporate rating similar to ours that have recently priced credit facilities.

Our required term loan payments after March 31, 2020 are as follows (in thousands):

2020	14,062
2021	21,563
2022	22,500
2023	43,925
Total	\$ 102,050

The maximum amount of credit available under the loan agreement for revolving loans and letters of credit as ofMarch 31, 2020 was \$350 million. We pay an unused commitment fee and fees on letters of credit that are issued. We had no letters of credit outstanding as of March 31, 2020 and \$54 thousand letters of credit outstanding as of December 31, 2019.

Under the loan agreement we may elect to increase the maximum availability of the term loan facility, the revolving loan facility, or both facilities, up to an aggregate additional amount of \$100 million.

We pay interest on the term loan borrowings and revolving loan borrowings at LIBOR plus a base margin or at a base rate (typically the prime rate) plus a base margin. As of March 31, 2020, the LIBOR base margin was 2.50% and the base rate base margin was 1.25%. The base margins increase or decrease in increments as our Total Funded Debt/EBITDA Ratio increases or decreases.

The loan agreement requires interest rate hedges on a portion of the outstanding term loan until February 6, 2021. We have executed compliant interest rate hedges. The amount of our debt with interest rate swap agreements was \$145 million and \$125 million as of March 31, 2020 and December 31, 2019, respectively.

After taking into account the impact of interest rate swap agreements, as of March 31, 2020, interest rates on portions of our outstanding debt ranged from 3.11% to 5.31%, and the effective interest rate on our aggregate outstanding debt was 4.06%.

Interest expense incurred on bank loan borrowings and interest rate hedges was approximately\$3.4 million and \$2.9 million for the three months endedMarch 31, 2020 and 2019, respectively.

The loan agreement contains collateral requirements to secure our loan agreement obligations, restrictive covenants, a limit on annual dividends, and other affirmative and negative covenants, conditions, and limitations. Restrictive covenants include a maximum Total Funded Debt/EBITDA Ratio and a minimum Fixed Charge Coverage Ratio. We were in compliance with required ratios and other

Table of Contents

terms and conditions as of March 31, 2020. In the event that we are unable to maintain compliance with such covenants, we expect to obtain an amendment or waiver from our lenders, refinance the indebtedness subject to covenants or take other mitigating actions prior to a potential breach.

(6) Earnings Per Share

Basic earnings per share ("EPS") is computed by dividing net income by the weighted average number of shares of common stock outstanding during each period. Shares issued during the period are weighted for the portion of the period that they were outstanding. Our calculation of diluted earnings per common share includes the dilutive effects for an assumed vesting of restricted stock awards.

	Three months en	nded March 31,
	2020	2019
Basic weighted average common shares outstanding	11,000,204	10,920,171
Effect of dilutive shares	100,302	53,910
Diluted weighted average common shares outstanding	11,100,506	10,974,081

(7) Commitments and Contingencies

Contingencies

We may have certain claims in the normal course of business, including legal proceedings, against us and against other parties. In our opinion, the resolution of these claims will not have a material adverse effect on our results of operations, financial position or cash flows. However, because the results of any legal proceedings cannot be predicted with certainty, the amount of loss, if any, cannot be reasonably estimated.

Further, from time-to-time, government agencies investigate whether our operations are being conducted in accordance with applicable contractual and regulatory requirements. Government investigations of us, whether relating to government contracts or conducted for other reasons, could result in administrative, civil or criminal liabilities, including repayments, fines or penalties being imposed upon us, or could lead to suspension or debarment from future government contracting. Government investigations often take years to complete and many result in no adverse action against us. We believe, based upon current information, that the outcome of any such government disputes and investigations will not have a material adverse effect on our results of operations, financial condition or cash flows.

(8) Business Segments and Customer Information

Business Segments

The following business segments names were changed effective January 1, 2020 as indicated below. The organization and financial reporting structure was not impacted by this change.

Management of our business operations is conducted under three reportable operating segments:

Aviation - Distribution and Repair Services

Our Aviation segment (formerly Aviation Group) provides aftermarket repair and distribution services to commercial, cargo, business and general aviation, military and defense, and rotorcraft customers globally. Core services include parts distribution, engine accessory maintenance, MRO services, rotable exchange and supply chain services.

Fleet - Distribution and Fleet Services

Our Fleet segment (formerly Supply Chain Management Group) provides parts, inventory management, e-commerce fulfillment, logistics, supply chain support and other services to support the commercial aftermarket medium- and heavy-duty truck market, the United States Postal Service ("USPS"), and the United States Department of Defense ("DoD"). Core services include vehicle parts

Table of Contents

distribution, sourcing, IT solutions, customized fleet logistics, warehousing, kitting, just-in-time supply chain management, alternative product sourcing, and engineering and technical support.

Federal and Defense - Logistics and Sustainment Services

Our Federal and Defense segment (formerly Federal Services Group) provides aftermarket MRO and logistics services to improve operational readiness and extend the life cycle of military vehicles, ships and aircraft for the DoD, federal agencies and international defense customers. Core services include base operations support; procurement; supply chain management; vehicle, maritime and aircraft sustainment services; IT services and energy consulting.

The operating segments reported below are the segments of the Company for which separate financial information is available and for which segment results are evaluated regularly by our Chief Executive Officer in deciding how to allocate resources and in assessing performance. We evaluate segment performance based on consolidated revenues and operating income. Net sales of our business segments exclude intersegment sales as these activities are eliminated in consolidation. Our segment information is as follows (in thousands):

	Three months	ended M	farch 31,
	 2020		2019
Revenues:			
Aviation	\$ 58,080	\$	49,370
Fleet	53,204		51,704
Federal and Defense	66,134		68,845
Total revenues	\$ 177,418	\$	169,919
Operating income:			
Aviation	\$ (1,880)	\$	3,048
Fleet	6,906		6,988
Federal and Defense	4,924		3,385
Corporate/unallocated expenses	(216)		(1,608)
Operating income	\$ 9,734	\$	11,813

Our Aviation segment operating income for the first quarter of 2020 was reduced by \$7.5 million as a result of the loss on the sale of our Prime Turbines LLC subsidiary and certain related inventory assets. See Note (3) "Divestiture" to our Consolidated Financial Statements for additional details regarding this transaction. This decrease was offset by a gain of \$1.1 million realized upon the completion of a sale-leaseback transaction for a property we owned in Miami, Florida. In the first quarter of 2020, we closed on a sale-leaseback agreement involving land and an office building utilized by our Aviation segment to conduct operations in Miami, Florida. Under the agreement, the land and building, with a net book value of \$1.3 million was sold for a sale price of \$2.6 million and leased back under a 6-year term operating lease commencing upon the closing of the transaction. The lease provides us with an option to extend the lease upon the expiration of its term in April 2026 for two additional five-year periods. In connection with the sale and leaseback transaction, we recognized the gain after incurring \$200 thousand in selling expenses.

Table of Contents

Customer Information

Our revenues are derived from contract services performed for DoD agencies or federal civilian agencies and from the delivery of products to our commercial clients. The USPS, U.S. Army and Army Reserve, and U.S. Navy are our largest customers. Our customers also include various other government agencies and commercial entities. Our revenue by customer is as follows for the quarters ended March 31, (in thousands):

	Three months ended March 31,									
Customer		2020	%		2019	%				
DoD	\$	64,134	36%	\$	62,701	37%				
Other government		45,990	26%		53,659	32%				
Commercial		67,294	38%		53,559	31%				
Total	\$	177,418	100%	\$	169,919	100%				

(9) Goodwill and Intangible Assets

Changes in goodwill for the three months ended March 31, 2020 are as follows (in thousands):

	Fleet		eet Federal and Defense Aviation		al and Defense Aviation			Total		
Balance as of December 31, 2019	\$	63,190	\$	30,883	\$	182,377	\$	276,450		
Decrease from divestiture		_		_		(7,379)		(7,379)		
Balance as of March 31, 2020	\$	63,190	\$	30,883	\$	174,998	\$	269,071		

We perform an annual review of goodwill for impairment during the fourth quarter and whenever events or other changes in circumstances indicate that the carrying value may not be fully recoverable. As a result of the decline in the macroeconomic environment caused by the COVID-19 pandemic and the decrease in our market capitalization, we performed an interim impairment analysis as of March 31, 2020. The result of the impairment analysis indicated that our reporting units' goodwill was not impaired. We will continue to evaluate these reporting units for potential goodwill impairment in 2020 as market conditions evolve.

In the first quarter of 2020, we completed the sale of the Prime Turbines subsidiary and certain related inventory assets and recognized a loss on the sale of the business and inventory of \$7.5 million. Prime Turbines was reported within our Aviation segment. As part of determining the loss on sale, goodwill of \$7.4 million was allocated to the disposal group on a relative fair value basis and was written-off upon the completion of the sale.

Intangible assets consist of the value of contract and customer-related intangible assets, acquired technologies and trade names. Amortization expense was approximately\$4.7 million and \$5.0 million for the three months ended March 31, 2020 and March 31, 2019, respectively.

Table of Contents

Intangible assets, net comprised the following (in thousands):

	Cost		Accumulated Amortization				Accumulated Impairment Loss	1	Net Intangible Assets
March 31, 2020									
Contract and customer-related	\$ 213,194	\$	(99,997)	\$	(1,025)	\$	112,172		
Acquired technologies	12,400		(9,942)		_		2,458		
Trade names	18,770		(14,234)		_		4,536		
Total	\$ 244,364	\$	(124,173)	\$	(1,025)	\$	119,166		
December 31, 2019									
Contract and customer-related	\$ 227,594	\$	(102,169)	\$	(1,025)	\$	124,400		
Acquired technologies	12,400		(9,660)		_		2,740		
Trade names	18,770		(13,735)		_		5,035		
Total	\$ 258,764	\$	(125,564)	\$	(1,025)	\$	132,175		

(10) Fair Value Measurements

The accounting standard for fair value measurements defines fair value, and establishes a market-based framework or hierarchy for measuring fair value. The standard is applicable whenever assets and liabilities are measured at fair value.

The fair value hierarchy established in the standard prioritizes the inputs used in valuation techniques into three levels as follows:

Level 1-Observable inputs - quoted prices in active markets for identical assets and liabilities;

Level 2-Observable inputs other than the quoted prices in active markets for identical assets and liabilities – includes quoted prices for similar instruments, quoted prices for identical or similar instruments in inactive markets and amounts derived from valuation models where all significant inputs are observable in active markets; and

Level 3-Unobservable inputs – includes amounts derived from valuation models where one or more significant inputs are unobservable and require us to develop relevant assumptions.

The following table summarizes the financial assets and liabilities measured at fair value on a recurring basis as ofMarch 31, 2020 and December 31, 2019 and the level they fall within the fair value hierarchy (in thousands):

Amounts Recorded at Fair Value	Financial Statement Classification	Fair Value Hierarchy	Fair V	alue March 31, 2020	Fa	air Value December 31, 2019
Non-COLI assets held in Deferred Supplemental Compensation Plan	Other assets	Level 1	\$	946	\$	710
Interest rate swap agreements	Accrued expenses	Level 2	\$	2,636	\$	1,473
Earn-out obligation - short-term	Current portion of earn-out obligation	Level 3	\$	5,300	\$	31,700
Earn-out obligation - long-term	Earn-out obligation	Level 3	\$	_	\$	5,000

Non-COLI assets held in our deferred supplemental compensation plan consist of equity funds with fair value based on observable inputs such as quoted prices for identical assets in active markets and changes in fair value are recorded as selling, general and administrative expenses.

We account for our interest rate swap agreements under the provisions of ASC 815, Derivatives and Hedging, and have determined that our swap agreements qualify as highly effective cash flow hedges. We evaluate our hedges to determine their effectiveness and

Table of Contents

as of March 31, 2020 and December 31, 2019, the swaps were determined to be fully effective. Accordingly, the fair value of the swap agreements, which is a liability recorded in accrued expenses and other current liabilities in our consolidated balance sheets, was approximately \$2.6 million and \$1.5 million at March 31, 2020 and December 31, 2019, respectively. The offset, net of an income tax effect of approximately \$658 thousand and \$367 thousand, was included in accumulated other comprehensive income in the accompanying balance sheets as of March 31, 2020 and December 31, 2019, respectively. The amounts paid and received on the swap agreements are recorded in interest expense in the period during which the related floating-rate interest is incurred. We expect the hedges to remain fully effective during the remaining terms of the swap agreements. We determine the fair value of the swap agreements based on a valuation model using primarily observable market data inputs.

We utilized an income approach to determine the fair value of our 1st Choice Aerospace acquisition earn-out obligation. Significant unobservable inputs used to value the contingent consideration include projected revenue and cost of services and the discount rate. If a significant increase or decrease in the discount rate occurred in isolation, the result could be significantly higher or lower fair value measurement.

Changes in earn-out obligation measured at fair value on a recurring basis using significant unobservable inputs (Level 3) for the three months endedMarch 31, 2020 are as follows (in thousands):

	(Current portion	Long-term portion	Total	
Balance as of December 31, 2019	\$	31,700	\$	5,000	\$ 36,700
Earn-out payments		(31,700)		_	(31,700)
Fair value adjustment included in net income		300		_	300
Reclassification from long-term to current		5,000		(5,000)	_
Balance as of March 31, 2020	\$	5,300	\$	_	\$ 5,300

(11) Income Taxes

Our effective tax rate was 46.7% and 23.7% for the three months ended March 31, 2020 and 2019, respectively. Income tax expense during interim periods is based on our estimated annual effective income tax rate plus any discrete items that are recorded in the period in which they occur. Our tax rate is affected by discrete items that may occur in any given year, but may not be consistent from year to year. The higher effective tax rate for the three months ended March 31, 2020 primarily results from a full valuation allowance established to offset the capital loss benefit in connection with our sale of Prime Turbines due to a lack of anticipated capital gain income in the carryforward period. We expect a lower effective tax rate for the year ended December 31, 2020 than the first quarter rate when the impact of the discrete item is spread over the entire twelve month period.

(12) Recently Issued Accounting Pronouncements Not Yet Adopted

In March 2020, the FASB issued ASU 2020-04, "Reference Rate Reform (Topic 848): Facilitation of the Effects of Reference Rate Reform on Financial Reporting." The amendments provide optional guidance for a limited time to ease the potential burden in accounting for reference rate reform. The new guidance provides optional expedients and exceptions for applying U.S. GAAP to contracts, hedging relationships and other transactions affected by reference rate reform if certain criteria are met. The amendments apply only to contracts and hedging relationships that reference LIBOR or another reference rate expected to be discontinued due to reference rate reform. These amendments are effective immediately and may be applied prospectively to contract modifications made and hedging relationships entered into or evaluated on or before December 31, 2022. We are currently evaluating our contracts and the optional expedients provided by the new standard.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

General Overview

Our Business

VSE is a leading provider of aftermarket distribution and repair services for land, sea and air transportation assets for government and commercial markets. Our core services include maintenance, repair and overhaul ("MRO") services, parts distribution, supply chain management and logistics, engineering support, and consulting and training services for global commercial, federal, and military and defense customers. We also provide information technology and energy consulting services.

1st Choice Aerospace Acquisition

In January 2019, we acquired 1st Choice Aerospace, with operations in Florida and Kentucky. 1st Choice provides component MRO services and products for new generation and legacy commercial aircraft families. 1st Choice Aerospace is a subsidiary of VSE Aviation, Inc. under our Aviation segment. See Note (2) "Acquisition" to our Consolidated Financial Statements included in Item 1 of this filing for additional information regarding our acquisition of 1st Choice Aerospace.

Prime Turbines Divestiture

In February 2020, we sold our subsidiary Prime Turbines, LLC for \$20.7 million in cash. VSE's Aviation segment will no longer offer turboprop engine MRO services, and will concentrate on higher growth potential component/accessory repair and parts distribution while further expanding our presence within the global commercial and general aviation markets. Prime Turbines' revenues totaled approximately 4% of VSE's revenue for 2019.

Organization and Segments

Our operations are conducted within three reportable segments: (1) Aviation; (2) Fleet; and (3) Federal and Defense. We provide more information about each of these reportable segments under Item 1 "Business-History and Organization" in our Form 10-K for the year 2019.

Concentration of Revenues

(in thousands)

	For the three months ended March 31,									
Source of Revenue	2020		%			2019	%			
DoD	\$	64,134	3	6	\$	62,701		37		
Other government		45,990	2	26		53,659		32		
Commercial		67,294	3	8		53,559		31		
Total revenues		\$177,418	10	0	\$	169,919	1	100		

COVID-19 Discussion

Forward Looking Information

Disclosures that address business and operating considerations associated with the COVID-19 pandemic are made under highly uncertain conditions and may involve forward looking information that is based on assumptions and expectations regarding future events. Please refer to the discussion under Part II, Item 1A "Risk Factors" of this Form 10-Q with respect to our discussion of trends or uncertainties arising from or impacted by the COVID-19 pandemic.

Demand for Products and Services, Operating Results, and Financial Condition

As further discussed below, the COVID-19 global pandemic did not have a significant impact on any of our businesses through the end of the first quarter as compared to other industries, and we have continued to operate with limited disruption. Our Aviation

segment will see a reduction in demand from customers for our products and services throughout the remainder of 2020. A significant decrease in demand would adversely impact our operating results for 2020. We cannot estimate with certainty the severity of this impact at this time. While current conditions raise the potential for sluggish performance for our Fleet segment and our Federal and Defense segment, we anticipate limited disruption in demand for the products and services they offer, as compared to other industries, due to the nature of their customer bases. Our parts supply for truck fleets, including the United States Postal Service ("USPS") delivery vehicles and our DoD program services, provide support for the essential services conducted by our customers. We have near-term opportunities to provide COVID-19 related products to one of these customers.

We have not experienced a material adverse change in our financial condition at this time, however, a prolonged disruption in the demand for our products and services could have an adverse impact on our operating results and cause a material adverse change in our financial condition. We will continue to evaluate the nature and extent of future impacts of COVID-19 on our business.

Capital, Financial Resources, Credit Losses, and Liquidity

Our debt capital and liquidity position have not experienced a material adverse change resulting from COVID-19 at this time, and we are meeting our obligations in a timely manner. We currently have sufficient cash flows and unused loan commitments to meet our obligations in the near term. Weakness in our Aviation segment customer markets has caused a delay in receivables collections and may increase bad debt expense in future periods. We do not anticipate receivables collections to negatively impact our Fleet or Federal and Defense segments.

We have a loan agreement with a bank group comprised of ten banks, including multiple large banks and multiple regional banks. Our banks have been supportive in the past and during the current COVID-19 crisis, and we are confident that they will work with us to meet the challenges presented by the current economic conditions created by COVID-19. The potential for future declines in our earnings may impact our financial covenant ratios in future periods, and may challenge our ability to meet these covenants. We are proactively working with our bank group to mitigate this circumstance.

Balance Sheet Asset Valuation

The valuation of our goodwill and intangible assets could be impacted by changes in economic conditions affecting our revenue projections and the valuation of public companies used in our valuation process. See "Material Impairments, Restructuring Charges" for further details. We currently do not believe that there are or will be significant changes in judgments in determining the fair value of other assets on our balance sheet or that our ability to timely account for them will be negatively impacted. While the COVID-19 crisis may cause some delays in collecting some of our accounts receivable and potentially give rise to some bad debt write offs, we do not expect the majority of our accounts receivable to be affected in such a manner.

Material Impairments, Restructuring Charges

Our most recent impairment analysis indicated that our reporting units in our Fleet and Federal and Defense segments had fair values substantially in excess of their carrying values, and we believe the COVID-19 induced economic crisis is not likely to have an adverse impact on customer demand for products and services provided by these two segments. Accordingly, at this time we do not anticipate any impairments in these two business segments.

Our interim impairment analysis also indicated that our VSE Aviation reporting unit, within our Aviation segment, approximated its carrying value, and we determined that this reporting unit has an increased likelihood of impairment if a prolonged downturn in customer demand were to occur. Prior to the onset of the COVID-19 pandemic, our Aviation segment was performing strongly. We anticipate that our VSE Aviation reporting unit will experience a downturn in customer demand in the near term, but believe in the market opportunities for us in the long term. Accordingly, at this time we do not anticipate any material impairments in our Aviation segment.

The COVID-19 induced economic crisis did not result in any material restructuring charges in the quarter.

Administrative Continuity and Reporting Systems

We have modified our workforce policies, procedures and capabilities for most of our administrative personnel to work remotely, including our financial reporting personnel. This remote work arrangement is working as intended and has not had any adverse effect on our ability to maintain financial operations, including financial reporting systems, internal control over financial reporting, and disclosure controls and procedures.

Business Continuity Plans

As the COVID-19 pandemic continues to drive global uncertainty, we remain focused on protecting the safety of employees, continuing to serve our customers with the highest quality product and repair services, and on upholding the strength of the business.

Our business operations are deemed critical and essential by the U.S. Department of Homeland Security. All of our repair, distribution and base operations facilities remain open and operational, and we continue to deliver products and services to customers without interruption. We implemented virus prevention protocols consistent with guidelines issued by the U.S. Centers for Disease Control and Prevention, and mandated remote working where practicable.

We do not anticipate any material expenditures or resource constraints in supporting our operations at this time.

Impact on Supply Chain

Major customers and suppliers of our Fleet, Federal and Defense and Aviation segments remain open and continue to operate. Our Fleet segment customers provide essential services, and we, along with our suppliers, play a key role in keeping truck fleets operable. Our Federal and Defense segment customers continue their mission critical essential services. Our Aviation segment customers continue to operate, albeit at lower rates. While the overall economic downturn may cause some slowness in every industry, we do not anticipate any material parts availability concerns, disruptions in our supply of materials or resources, or a material adverse impact on our procurement capabilities or product costs.

Human Capital Resources

The health and safety of our employees, customers and communities are of primary concern. We have taken significant steps to protect our workforce including but not limited to, working remotely. For our locations with an active on-site workforce, we implemented virus prevention protocols consistent with guidelines issued by the U.S. Centers for Disease Control and Prevention. We have taken steps at our facilities to ensure additional employee safety, including implementing separate operational shifts, strict social distancing requirements, providing personal protective equipment, and stringent requirements for cleaning and sanitizing at our work sites. We do not anticipate our operations being materially impacted by any constraints or other impacts on our human capital resources and productivity.

We recently completed a cost reduction plan which included a reduction in workforce. The plan is expected to reduce approximately \$13 million in expenses on an annualized basis beginning in the second quarter of 2020.

Travel Restrictions

Travel restrictions and border closures may limit the manner in which our sales and support staff service our customers. We do not anticipate this will have a material impact on our ability to operate.

Business Trends

The following discussion provides a brief description of some of the key business factors impacting our results of operations detailed by segment.

Aviation Segment

Organic revenue growth in our Aviation businesses for the first quarter was approximately 18%. Growth in our distribution services was driven by our parts distribution expansion to global commercial and business and general aviation customers. Growth in our repair services was driven primarily by expansion of our engine accessory and component repair work. We believe this progress, together with the introduction of new sales initiatives, has positioned us for above market growth for the remainder of 2020. However, the COVID-19 pandemic induced a reduction in global demand for air travel, and decreased revenue passenger miles will have an adverse impact on demand for our Aviation products and services for the remainder of 2020. Since industry demand is currently uncertain, we cannot predict the extent the pandemic will have on our Aviation revenues if health and safety requirements such as travel restrictions and social distancing measures are extended.

In the first quarter of 2020, we divested our Prime Turbines subsidiary, a business offering turboprop engine MRO services. We will no longer offer these services, focusing instead on higher growth component/accessory repair and parts distribution.

Fleet Segment

Our Fleet segment continues to focus on both its core USPS and DOD customer base and customer diversification. Non-USPS segment revenue grew approximately 49% on a year-over-year basis in the first quarter of 2020, supported by increased activity with commercial parts distribution. To enable this transition, we are expanding our presence in both new and existing markets, including e-commerce solutions, private brand product sales, traditional parts supply, supply chain services, and just-in-time inventory programs to new commercial customers. Our e-commerce fulfillment services resulted in continued growth in the first quarter and we expect additional expansion of this service offering going forward. We believe the COVID-19 pandemic is likely to have a limited adverse impact on revenues for this segment of our business, as demand from our commercial truck fleet customers and our e-commerce platforms appears to be progressing steadily.

Federal and Defense Segment

We entered 2020 with a focus on growing this segment of our business and redefining VSE in the federal marketplace. We are investing in business development, growing our capability offerings, and broadening our range of new business targets to build our contract backlog and expand our markets. The anticipated revenue decline experienced by this segment in the first quarter of 2020 is primarily attributable to the expiration of a large U.S. Army contract in January. We are confident our refocused business development efforts in 2020 will produce revenue growth in subsequent years. We expect the COVID-19 pandemic to have a limited adverse impact on revenues for this segment, as the U.S. government is expected to maintain critical DoD preparedness programs.

Financial Statement Presentation

The following discussion provides a brief description of certain key items that appear in our consolidated financial statements:

Revenues

Revenues are derived from the delivery of products and from professional and technical services performed through various ordering agreements and contract agreements. The three primary types of contracts used are cost-type, fixed-price, and time and materials. Revenues from these contract types result from work performed on these contracts and from costs for materials and other work-related contract allowable costs.

Costs and Operating Expenses

Costs and operating expenses consist primarily of cost of inventory and delivery of our products sold; direct costs, including labor, material, and supplies used in the performance of our contract work; indirect costs associated with our direct contract costs; sales, general, and administrative expenses associated with our operating segments and corporate management; and certain costs and charges arising from nonrecurring events outside the ordinary course of business. These costs will generally increase or decrease in conjunction with our level of products sold or contract work performed. Costs and operating expenses also include expense for amortization of intangible assets acquired through our acquisitions. Expense for amortization of acquisition related intangible assets is included in the segment results in which the acquisition is included. Segment results also include expense for an allocation of corporate management costs. We reduced controllable costs during the first quarter of 2020 and plan for further reductions to begin in the second quarter of 2020.

Bookings and Funded Backlog

Revenues for federal government contract work performed by our Federal and Defense segment depend on contract funding ("bookings"), and bookings generally occur when contract funding documentation is received. Funded contract backlog is an indicator of potential future revenue. While bookings and funded contract backlog generally result in revenue, we may occasionally have funded contract backlog that expires or is de-obligated upon contract completion and does not generate revenue.

For the first quarter of 2020, Federal and Defense segment bookings increased 31% year-over-year to \$67 million, while total funded backlog declined 28% year-over-year to \$201 million. The decline in funded backlog was primarily attributable to the expiration of a contract in the first quarter of 2020. The current management team is focused on revitalizing this business, with an emphasis on growing backlog and developing a channel of new customer activity in the current year, with good process in the first quarter.

A summary of our bookings and revenues for our Federal and Defense segment for thethree months ended March 31, 2020 and 2019, and funded contract backlog as of March 31, 2020 and 2019 is as follows (in millions):

	2020	2019
Bookings	67	\$ 51
Revenues	66	\$ 69
Funded Contract Backlog	\$ 201	\$ 278

Critical Accounting Policies, Estimates and Judgments

Our consolidated financial statements are prepared in accordance with United States generally accepted accounting principles ("U.S. GAAP"), which require us to make estimates and assumptions. Certain critical accounting policies affect the more significant accounts, particularly those that involve judgments, estimates and assumptions used in the preparation of our consolidated financial statements. The development and selection of these critical accounting policies have been determined by our management. We have reviewed our critical accounting policies and estimates with the audit committee of our board of directors. Due to the significant judgment involved in selecting certain of the assumptions used in these policies, it is possible that different parties could choose different assumptions and reach different conclusions. We consider our policies relating to the following matters to be critical accounting policies.

Revenue Recognition

We account for revenue in accordance with ASC 606. The unit of account in ASC 606 is a performance obligation. At the inception of each contract with a customer, we determine our performance obligations under the contract and the contract's transaction price. A performance obligation is a promise in a contract to transfer a distinct good or service to the customer and is defined as the unit of account. A contract's transaction price is allocated to each distinct performance obligation and recognized as revenue when the performance obligation is satisfied. The majority of our contracts have a single performance obligation as the promise to transfer the respective goods or services is not separately identifiable from other promises in the contracts and is, therefore, not distinct. For product sales, each product sold to a customer typically represents a distinct performance obligation. Our performance obligations are satisfied over time as work progresses or at a point in time based on transfer of control of products and services to our customers.

Contract modifications are routine in the performance of our contracts. Contracts are often modified to account for changes in contract specifications or requirements. In most instances, contract modifications are for goods or services that are not distinct, and therefore are accounted for as part of the existing contract.

Substantially all Fleet segment revenues from the sale of vehicle parts to customers are recognized at the point in time of the transfer of control to the customer. Sales returns and allowances for vehicle parts are not significant.

Our Aviation segment revenues result from the sale of aircraft parts and performance of MRO services for private and commercial aircraft owners, other aviation MRO providers, and aviation original equipment manufacturers. Our Aviation segment recognizes revenues for the sale of aircraft parts at a point in time when control is transferred to the customer, which usually occurs when the parts are shipped. Our Aviation segment recognizes revenues for MRO services over time as the services are transferred to the customer. MRO services revenue recognized is measured based on the cost-to-cost input method, as costs incurred reflect the work completed, and therefore the services transferred to date. Sales returns and allowances are not significant.

Our Federal and Defense segment revenues result from professional and technical services, which we perform for customers on a contract basis. Revenue is recognized for performance obligations over time as we transfer the services to the customer. The three primary types of contracts used are cost-type, fixed-price and time and materials. Revenues result from work performed on these contracts by our employees and our subcontractors and from costs for materials and other work-related costs allowed under our contracts.

Revenues on cost-type contracts are recorded as contract allowable costs are incurred and fees are earned. Variable consideration, typically in the form of award fees, is included in the estimated transaction price, to the extent that it is probable that a significant reversal will not occur, when there is a basis to reasonably estimate the amount of the fee. These estimates are based on historical award experience, anticipated performance and our best judgment based on current facts and circumstances.

Revenues on fixed-price contracts are recorded as work is performed over the period. Revenue is recognized over time using costs incurred to date relative to total estimated costs at completion to measure progress toward satisfying our performance obligations. Incurred cost represents work performed, which corresponds with the transfer of control to the customer. For such contracts, we

estimate total costs at the inception of the contract based on our assumptions of the cost elements required to complete the associated tasks of the contract and assess the effects of the risks on our estimates of total costs to complete the contract. Our cost estimates are based on assumptions that include the complexity of the work, our employee labor costs, the cost of materials, and the performance of our subcontractors. These cost estimates are subject to change as we perform under the contract and as a result, the timing of revenues and amount of profit on a contract may change as there are changes in estimated costs to complete the contract. Such adjustments are recognized on a cumulative catch-up basis in the period we identify the changes.

Revenues for time and materials contracts are recorded based on the amount for which we have the right to invoice our customers, because the amount directly reflects the value of our work performed for the customer. Revenues are recorded on the basis of contract allowable labor hours worked multiplied by the contract defined billing rates, plus the direct costs and indirect cost burdens associated with materials and subcontract work used in performance on the contract. Generally, profits on time and materials contracts result from the difference between the cost of services performed and the contract defined billing rates for these services.

Revenues related to work performed on government contracts at risk, which is work performed at the customer's request prior to the government formalizing funding, is not recognized until it can be reliably estimated and its realization is probable.

A substantial portion of contract and administrative costs are subject to audit by the Defense Contract Audit Agency. Our indirect cost rates have been audited and approved for 2013 and prior years with no material adjustments to our results of operations or financial position. While we maintain reserves to cover the risk of potential future audit adjustments based primarily on the results of prior audits, we do not believe any future audits will have a material adverse effect on our results of operations, financial position, or cash flows.

Business Combinations

We account for business combinations under the acquisition method of accounting. The purchase price of each business acquired is allocated to the tangible and intangible assets acquired and the liabilities assumed based on information regarding their respective fair values on the date of acquisition. Any excess of the purchase price over the fair value of the separately identifiable assets acquired and liabilities assumed is allocated to goodwill. Determining the fair value of assets acquired and liabilities assumed requires management's judgment and often involves the use of significant estimates and assumptions, including assumptions with respect to future cash inflows and outflows, discount rates, and market multiples, among other items. We determine the fair values of intangible assets acquired generally in consultation with third-party valuation advisors. The valuation of assets acquired and liabilities assumed requires a number of judgments and is subject to revision as additional information about the fair values becomes available. We will recognize any adjustments to provisional amounts that are identified during the period not to exceed twelve months from the acquisition date (the "measurement period") in which the adjustments are determined. Acquisition costs are expensed as incurred. The results of operations of businesses acquired are included in the consolidated financial statements from their dates of acquisition.

As part of the agreement to acquire certain subsidiaries, we may be obligated to pay contingent consideration should the acquired entity meet certain earnings objectives subsequent to the date of acquisition. As of the acquisition date, contingent consideration is recorded at fair value as determined through the use of a probability-based scenario analysis approach. Under this approach, a set of potential future subsidiary earnings is estimated based on various revenue growth rate assumptions for each scenario. A probability of likelihood is then assigned to each potential future earnings estimate and the resultant contingent consideration is calculated and discounted using a weighted average discount rate. The fair value is measured each reporting period subsequent to the acquisition date and any changes are recorded within cost and operating expenses within our consolidated statement of income. Changes in either the revenue growth rates, related earnings or the discount rate could result in a material change to the amount of the contingent consideration accrued.

Goodwill and Intangible Assets

Goodwill is subject to a review for impairment at least annually. We perform an annual review of goodwill for impairment during the fourth quarter and whenever events or other changes in circumstances indicate that the carrying value may not be fully recoverable. We estimate the fair value of our reporting units using a weighting of fair values derived from the income approach and market approach. Under the income approach, we calculate the fair value of a reporting unit based on the present value of estimated future cash flows. Cash flow projections are based on our estimates of revenue growth rates and operating margins, taking into consideration industry and market conditions. The discount rate used is based on a weighted average cost of capital adjusted for the relevant risk associated with the characteristics of the business and the projected cash flows.

Despite the excess fair value identified in our 2019 impairment assessment, market conditions from the COVID-19 pandemic resulted in a significant decline in our market capitalization. Over the same period, the equity value of our peer group companies and the

overall U.S. stock market also declined significantly amid market volatility. Based on these factors, we concluded that a triggering event occurred and, we performed a qualitative assessment whether it was more likely than not that our goodwill was impaired as of March 31, 2020.

We reviewed our previous forecasts and assumptions based on our current projections that are subject to various risks and uncertainties, including the duration and extent of impact to our business from the COVID-19 pandemic. Based on our qualitative assessment as of March 31, 2020, we have determined it is more likely than not that the fair value exceeded the carrying value of our reporting units with the exception of our VSE Aviation reporting unit, which required a quantitative interim impairment test.

Declines were driven by the uncertainty surrounding the outbreak of the COVID-19 and macroeconomic events, which resulted in decreases in air travel. Accordingly, an interim quantitative impairment test was performed as of March 31, 2020 for our VSE Aviation reporting unit. Under the income approach, the fair value for our VSE Aviation reporting unit was determined based on the present value of estimated future cash flows, discounted at an appropriate risk-adjusted rate. We used our internal forecasts, updated for recent events, to estimate future cash flows and an increased discount rate of 100 basis points from the rate used in the analysis performed in the prior year. Based on our interim goodwill impairment analysis, the fair value of our VSE Aviation reporting unit approximated its carrying value. Because the fair value of our VSE Aviation reporting unit approximated its carrying value, a negative change in the key assumptions used in the interim impairment analysis or an increase in the carrying value may result in a future impairment of this reporting unit's goodwill. Any significant adverse changes in future periods to our internal forecasts or external market conditions could reasonably be expected to negatively affect our key assumptions and may result in future goodwill impairment charges which could be material. For example, keeping all other assumptions the same, an additional increase in the discount rate or an increase in the carrying value could result in an impairment in the reporting unit's goodwill.

The carrying value of our VSE Aviation reporting unit included goodwill of approximately\$175 million as of March 31, 2020.

As of March 31, 2020, we have no intangible assets with indefinite lives and we had an aggregate of approximately\$269 million of goodwill associated with our acquisitions.

We also review the recoverability of our long-lived intangible assets with finite lives when an indicator of impairment exists. For the same reasons discussed above, we assessed the recoverability of the long-lived intangible assets with finite lives as of March 31, 2020. Based on our analysis of estimated undiscounted future cash flows expected to result from the use of these long-lived intangible assets with finite lives, we determined that their carrying values were recoverable.

Income Taxes

Income taxes are accounted for under the asset and liability method. Under the asset and liability method, deferred tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. This method also requires the recognition of future tax benefits, such as net operating loss and capital loss carryforwards, to the extent that realization of such benefits is more likely than not. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date

The carrying value of net deferred tax assets is based on assumptions regarding our ability to generate sufficient future taxable income to utilize these deferred tax assets

Recently Issued Accounting Pronouncements

For a description of recently announced accounting standards, including the expected dates of adoption and estimated effects, if any, on our consolidated financial statements, see "Recently Issued Accounting Pronouncements" in Note (12) of the Notes to our Unaudited Consolidated Financial Statements in Item 1 of this report.

Results of Operations

The following discussion of our Results of Operations and Liquidity and Capital Resources includes a comparison of first quarter 2020 to first quarter 2019.

	Three	Change		
	ended M	March (31,	Three
	2020		2019	Months
Revenues	\$ 177,418	\$	169,919	\$ 7,499
Costs and operating expenses	161,256		158,106	3,150
Loss on sale of a business entity and certain assets	(7,536)		_	(7,536)
Gain on sale of property	1,108		_	1,108
Operating income	9,734		11,813	(2,079)
Interest expense, net	3,486		3,158	328
Income before income taxes	6,248		8,655	(2,407)
Provision for income taxes	2,916		2,052	864
Net income	\$ 3,332	\$	6,603	\$ (3,271)

Quarter Ended March 31, 2020 Compared to Quarter Ended March 31, 2019

Revenues

Our revenues increased approximately \$7.5 million or 4.4% for the first quarter of 2020 compared to the same period for the prior year. The change in revenues resulted from an increase in our Aviation segment of approximately \$8.7 million, an increase in our Fleet segment of approximately \$1.5 million, and a decrease in our Federal and Defense segment of approximately \$2.7 million. See "Segment Operating Results" for a breakdown of our results of operations by segment.

Costs and Operating Expenses

Our costs and operating expenses increased approximately \$3.2 million or 2.0% for the first quarter of 2020 compared to the same period for the prior year. Costs and operating expenses for our Aviation segment and our Fleet segment increased for the quarter and costs and operating expenses for our Federal and Defense segment decreased for the quarter due to changes in revenues. Costs and operating expenses for 2020 included approximately \$300 thousand of earn-out adjustment expense. Costs and operating expenses for 2019 included approximately \$1.1 million of acquisition related and executive succession costs.

Loss on Sale of a Business Entity and Certain Assets

Loss on sale of a business entity and certain assets of \$7.5 million is comprised of the difference between the carrying value on our books for our Prime Turbines, LLC business and the sale price upon divestiture, plus the difference between the carrying value on our books of inventory sold that is used to support the operations of our divested Prime Turbines, LLC business and the sale price of the inventory upon divestiture.

Gain on Sale of Property

Gain on sale of property is comprised of \$1.1 million associated with the sale of a Miami, Florida real estate holding.

Operating Income

Excluding the loss on sale of a business entity and certain assets and gain on sale of property, our operating income for the first quarter of 2020 was approximately \$16.2 million, an increase of approximately \$4.3 million or 37% over the prior year. Operating income for 2020 was decreased by \$7.5 million due to the loss on the sale of Prime Turbines LLC and certain assets and increased approximately \$1.1 million by the gain on the sale of the real estate holding. After accounting for these events, our operating income for the first quarter of 2020 decreased approximately \$2.1 million or 17.6% compared to the same period for the prior year. Operating income decreased approximately \$4.9 million for our Aviation segment and increased approximately \$1.5 million for our Federal and Defense segment. Operating income was substantially unchanged for our Fleet segment. Operating income for 2019 was decreased approximately \$1.1 million due to the costs and expenses associated with acquisition related and executive succession costs.

Interest Expense

Interest expense increased approximately \$328 thousand for the first quarter of 2020 compared to the same period for the prior year, due primarily to an increase in our average level of bank borrowing.

Provision for Income Taxes

Our effective tax rate was 46.7% for the first quarter of 2020 and 23.7% for the first quarter of 2019. Our tax rate is affected by discrete items that may occur in any given year but may not be consistent from year to year. Capital gains tax treatment, state income taxes, certain tax credits and other items caused differences between our statutory U.S. Federal income tax rate and our effective tax rate. Other permanent differences and federal and state tax credits such as foreign derived intangible income ("FDII") deduction, the work opportunity tax credit, and educational improvement tax credits provide benefit to our tax rates. The higher effective tax rate for the first quarter of 2020 primarily results from a full valuation allowance established to offset the capital loss benefit in connection with our sale of Prime Turbines due to a lack of anticipated capital gain income in the carryforward period. We expect a lower effective tax rate for the year ended December 31, 2020 than the first quarter rate when the impact of the discrete item is spread over the entire twelve month period.

Segment Operating Results

Aviation Segment Results

The results of operations for our Aviation segment are (in thousands):

		Three months ended March 31,				Change		
						Three Months		
	2020		2019					
Revenues	\$	58,080	\$	49,370	\$	8,710		
Costs and operating expenses		53,532		46,322		7,210		
Loss on sale of a business entity and certain assets		(7,536)		_		(7,536)		
Gain on sale of property		1,108		_		1,108		
Operating (loss) income	\$	(1,880)	\$	3,048	\$	(4,928)		
Profit percentage		(3.2)%		6.2%				

Revenues for our Aviation segment increased approximately \$8.7 million or 17.6% for the first quarter of 2020 compared to the same period of the prior year primarily due to growth in our MRO services. Costs and operating expenses increased approximately \$7.2 million or 15.6%, primarily due to the increased level of repair services.

Loss on sale of a business entity and certain assets of \$7.5 million is comprised of the difference between the carrying value on our books for our Prime Turbines, LLC business and the sale price upon divestiture, plus the difference between the carrying value on our books of inventory sold that is used to support the operations of our divested Prime Turbines, LLC business and the sale price of the inventory upon divestiture.

Gain on sale of property is comprised of approximately \$1.1 million associated with the sale of a Miami, Florida real estate holding.

Excluding the loss on sale of a business entity and certain assets and gain on sale of property, our operating income for the first quarter of 2020 was approximately \$4.5 million, an increase of \$1.5 million or 49% over the prior year. The increase was primarily attributable to increased revenues and profits in our repair businesses. We had an operating loss of approximately \$1.9 million for the first quarter of 2020 compared to operating income of approximately \$3.0 million for the prior year.

Costs and operating expenses for this segment include expense for amortization of intangible assets associated with acquisitions, allocated corporate costs, and valuation adjustments to accrued earn-out obligations associated with acquisitions. Expense for amortization of intangible assets was approximately \$2.5 million and \$2.6 million for the first quarters of 2020 and 2019, respectively. Expense for allocated corporate costs was approximately \$2.1 million and \$1.7 million for the first quarters of 2020 and 2019, respectively. Valuation adjustments to the accrued earn-out obligation increased costs and operating expenses approximately \$300 thousand for the first quarter of 2020. There were no valuation adjustments to the accrued earn-out obligation for the first quarter of 2019.

Fleet Segment Results

The results of operations for our Fleet segment are (in thousands):

	Three months			Change			
	ended March 31,				Three		
	2020 2019			Months			
Revenues	\$	53,204	\$	51,704	\$	1,500	
Costs and operating expenses		46,298		44,716		1,582	
Operating income	\$	6,906	\$	6,988	\$	(82)	
Profit percentage		13.0%		13.5%			

Revenues for our Fleet segment increased approximately \$1.5 million or 3% for the first quarter of 2020 compared to the same period of the prior year. Revenues from sales to DoD customers decreased approximately \$3.0 million or 7%, and revenues from commercial customers increased approximately \$4.8 million or 122%. Costs and operating expenses increased approximately \$1.6 million or 4% and operating income decreased by approximately \$82 thousand or 1%. The decrease in operating income was primarily attributable to a change in the mix of customers and products sold, which lowered our profit margins.

Costs and operating expenses for this segment include expense for amortization of intangible assets associated with acquisitions and allocated corporate costs. Expense for amortization of intangible assets was approximately \$2.0 million for the first quarters of both 2020 and 2019. Expense for allocated corporate costs was approximately \$1.8 million for the first quarters of both 2020 and 2019.

Federal and Defense Segment Results

The results of operations for our Federal and Defense segment are (in thousands):

		Three months			Change			
		ended March 31,				Three		
	_	2020 2019		2019	Months			
Revenues	9	\$	66,134	\$	68,845	\$	(2,711)	
Costs and operating expenses			61,210		65,460		(4,250)	
Operating income	9	\$	4,924	\$	3,385	\$	1,539	
Profit percentage	-		7.4%		4.9%			

Revenues for our Federal and Defense segment decreased by \$2.7 million or 4% and costs and operating expenses decreased \$4.3 million or 6% for the first quarter of 2020 compared to the same period of the prior year primarily due to the expiration of a large U.S. Army contract in January 2020 and changes in the level of work required on our existing contracts. Other significant changes affecting our revenues and costs and operating expenses included an increase of approximately \$8.5 million in revenues from U.S. Navy program and decreased revenues of approximately \$3.3 million from other work.

Operating income increased approximately \$1.5 million or 45% for the first quarter of 2020 compared to the same period of the prior year. Revenue declines occurred in our lower margin work, resulting in minimal loss of operating income, and we have increased operating income through margin improvements primarily due to increased work being performed under more profitable fixed price contracts.

Financial Condition

There has been no material adverse change in our financial condition in the first quarter of 2020. Our bank debt increased approximately \$3.5 million and our earn-out obligation decreased approximately \$3.4 million. We had \$176 million of unused bank loan commitments as of March 31, 2020. Changes to other asset and liability accounts were primarily due to our earnings, our level of business activity, the timing of inventory purchases, contract delivery schedules, subcontractor and vendor payments required to perform our contract work, the timing of associated billings to and collections from our customers, the sale of a real estate holding in Miami, Florida, and the divestiture of our Prime Turbines subsidiary.

Liquidity and Capital Resources

Cash Flows

Cash and cash equivalents decreased approximately \$191 thousand during the first quarter of 2020.

Cash provided by operating activities increased approximately \$5.7 million in the first quarter of 2020 compared to the same period in 2019. The change was attributable to a decrease of approximately \$3.3 million in cash provided by net income, an increase of approximately \$7.2 million in other non-cash operating activities and an increase of approximately \$1.8 million due to changes in the levels of operating assets and liabilities.

Inventories and accounts receivable represent a significant amount of our assets, and accounts payable represent a significant amount of our operating liabilities. Cash used related to increases in inventory was approximately \$8.3 million, cash used related to increases in receivables and unbilled receivables was approximately \$2.2 million, and cash provided by increases in accounts payable and deferred compensation was approximately \$395 thousand for the first quarter of 2020. A significant portion of accounts receivable and accounts payable result from the use of subcontractors to perform work on our contracts and from the purchase of materials and inventory to fulfill contract obligations and distribution agreements. Accordingly, our levels of accounts receivable and accounts payable may fluctuate depending on the timing of material and inventory purchases, services ordered, product sales, government funding delays, the timing of billings received from subcontractors and materials vendors, and the timing of payments received for services. Such timing differences have the potential to cause significant increases and decreases in our inventory, accounts receivable, and accounts payable in short time periods, and accordingly, can cause increases or decreases in our cash provided by operations.

We have recently experienced and expect to continue to experience delays in some of our Aviation segment receivables as a result of the COVID-19 economic down-turn.

Cash provided by investing activities was approximately \$22.8 million in the first quarter of 2020 compared to cash used in investing activities of approximately \$113.3 million in the same period of the prior year. In 2019 approximately \$113 million was used for the acquisition of 1st Choice Aerospace and in 2020 approximately \$23.6 million was provided by proceeds from the sale of our Prime Turbines business and sale of a Miami, Florida real estate holding. Other cash used in investing activities consisted primarily of purchases of property and equipment.

Cash used in financing activities was approximately \$29.8 million in the first quarter of 2020 compared to cash provided by financing activities of approximately \$112.9 million in the same period of 2019. Financing activities consisted primarily of borrowing and repayment of debt, payment of dividends and payment of earn-out obligation.

We paid cash dividends totaling approximately \$1.0 million or \$0.09 per share in the first quarter of 2020. Pursuant to our bank loan agreement, our payment of cash dividends is subject to annual restrictions. We have paid cash dividends each year since 1973 and have increased our dividend each year since 2004.

Liquidity

Our internal sources of liquidity are primarily from operating activities, specifically from changes in our level of revenues and associated inventory, accounts receivable and accounts payable, and from profitability. Significant increases or decreases in revenues and inventory, accounts receivable and accounts payable can affect our liquidity. Our inventory and accounts payable levels can be affected by the timing of large opportunistic inventory purchases. Our accounts receivable and accounts payable levels can be affected by changes in the level of contract work we perform, by the timing of large materials purchases and subcontractor efforts used in our contracts, and by delays in the award of contractual coverage and funding and payments. Government funding delays can cause delays in our ability to invoice for revenues earned, presenting a potential negative impact on our days sales outstanding.

We also purchase property and equipment; invest in expansion, improvement, and maintenance of our operational and administrative facilities; and invest in the acquisition of other companies.

See "COVID-19 Discussion-Capital, Financial Resources, Credit Losses, and Liquidity" and "Item 1A. Risk Factors" for additional details regarding the impact of COVID-19 on our liquidity and capital resources. We have considered the effects of the COVID-19 pandemic on our liquidity and capital resources, and we currently do not expect a material adverse impact on our ability to meet future liquidity needs. As discussed in greater detail below, under the terms of our debt facility, we are required to maintain certain financial covenants. The pandemic has disrupted the demand for our Aviation segment products and services and further disruption

is possible. If our Aviation segment sales decline to the levels of having a material impact on our revenues, we may be not be able to satisfy our covenant requirements in the future. We are proactively working with our bank group to mitigate this circumstance.

Our external financing consists of a loan agreement with a bank group that provides for a term loan, revolving loans and letters of credit. The loan agreement, which was amended in November 2019 and expires in January 2023, has a term loan facility and a revolving loan facility. The revolving loan facility provides for revolving loans and letters of credit.

The term loan requires quarterly installment payments. Our required term loan payments afterMarch 31, 2020 are approximately \$14.1 million in 2020, \$21.6 million in 2021, \$22.5 million in 2022, and \$43.9 million in 2023. The amount of term loan borrowings outstanding as ofMarch 31, 2020 was \$102.1 million.

The maximum amount of credit available to us under our loan agreement for revolving loans and letters of credit as ofMarch 31, 2020 was \$350 million. We pay an unused commitment fee and fees on letters of credit that are issued. We had approximately \$174.2 million in revolving loan amounts outstanding and no of letters of credit outstanding as of March 31, 2020.

Under the loan agreement we may elect to increase the maximum availability of the term loan facility, the revolving loan facility, or a combination of both facilities. The aggregate limit of incremental increases is \$100 million.

We pay interest on the term loan borrowings and revolving loan borrowings at LIBOR plus a base margin or at a base rate (typically the prime rate) plus a base margin. As of March 31, 2020, the LIBOR base margin was 2.50% and the base rate base margin was 1.25%. The base margins increase or decrease in steps as our Total Funded Debt/EBITDA Ratio increases or decreases.

The loan agreement requires us to have interest rate hedges on a portion of the outstanding term loan until February 6, 2021. We executed compliant interest rate hedges. As of March 31, 2020, interest rates on portions of our outstanding debt ranged from 3.11% to 5.31%, and the effective interest rate on our aggregate outstanding debt was 4.06%.

The loan agreement contains collateral requirements to secure our loan agreement obligations, restrictive covenants, a limit on annual dividends, and other affirmative and negative covenants, conditions and limitations. The restrictive covenants require that we maintain a Fixed Charge Coverage Ratio of not less than 1.20 to 1.00 and a Funded Debt/EBITDA Ratio of not more than 3.50 to 1.00 (subject to adjustment, in certain circumstances). We were in compliance with required ratios and other terms and conditions as of March 31, 2020.

We currently do not use public debt security financing.

Inflation and Pricing

Most of our contracts provide for estimates of future labor costs to be escalated for any option periods, while the non-labor costs in our contracts are normally considered reimbursable at cost. Our property and equipment consist principally of land, buildings and improvements, shop and warehouse equipment, computer systems equipment, and furniture and fixtures. We do not expect the overall impact of inflation on replacement costs of our property and equipment to be material to our future results of operations or financial condition.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements that have, or are reasonably likely to have, a current or future material effect on our financial condition, changes in financial condition, revenue or expenses, results of operations, liquidity, capital expenditures or capital resources.

Disclosures About Market Risk

Interest Rates

Our bank loan agreement provides available borrowing to us at variable interest rates. Accordingly, future interest rate changes could potentially put us at risk for a material adverse impact on future earnings and cash flows. To mitigate the risks associated with future interest rate movements we have employed interest rate hedges to fix the rate on a portion of our outstanding borrowings for various periods.

In February 2018, we entered into a LIBOR based interest rate swap on our term loan for a term of three years with a notional amount of \$10 million for the first year and \$50 million for the second and third years. We pay an effective interest rate of 2.54% plus our base margin on the debt matched to this swap.

In February 2019, we entered into a LIBOR based interest rate swap on our revolving loan for a term of three years with a notional amount of \$75 million. This swap amount decreases in increments on an annual basis to \$45 million for the second year and to \$25 million for the third year. We pay an effective interest rate of 2.805% plus our base margin on the debt matched to this swap.

In March 2020, we entered into a LIBOR based interest rate swap on our revolving loan for a term of two years with a notional amount of \$50 million. We pay an effective interest rate of 0.73% plus our base margin on the debt matched to this swap.

VSE CORPORATIONS AND SUBSIDIARIES

Item 3. Quantitative and Qualitative Disclosures About Market Risks

See "Disclosures About Market Risk" in Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

COVID-19 Risks and Uncertainties

See "Item 1A. Risk Factors" in Part II within this Form 10-Q for additional discussion of current and potential risks of the COVID-19 pandemic on our business and financial performance.

Item 4. Controls and Procedures

As of the end of the period covered by this report, based on management's evaluation, with the participation of our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the disclosure controls and procedures (as defined in Rules 13a-15(e) or 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")), our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures are effective in ensuring that information required to be disclosed by us in reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is accumulated and communicated to our management, including our principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

In connection with our 1st Choice Aerospace acquisition, certain areas of internal control over financial reporting changed. These areas are primarily related to integrating our corporate functions such as entity level controls and certain financial reporting controls. Certain control structure items remain in operation at 1st Choice Aerospace, primarily related to information technology, inventory management, human resources, processing and billing of revenues, and collection of those revenues. The control structure at 1st Choice Aerospace has been modified to appropriately oversee and incorporate these activities into the overall control structure. We will continue to evaluate the need for additional internal controls over financial reporting.

There were no additional changes in our internal control over financial reporting during ourfirst quarter of fiscal 2020 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. Other Information

Item 1. Legal Proceedings

None.

Item 1A. Risk Factors

The risk factors disclosed in our Annual Report on Form 10-K for the fiscal year ended December 31, 2019 (the "Form 10-K") should be considered together with information included in this Quarterly Report on Form 10-Q for the quarter ended March 31, 2020 and should not be considered the only risks to which we are exposed. We are providing the following information regarding changes that have occurred to the previously disclosed risk factors in our Form 10-K. In addition to the risk factors discussed below, the impact of the Coronavirus Disease 2019 ("COVID-19") may also exacerbate other risks discussed in Item 1A. Risk Factors in our Form 10-K, any of which could have a material effect on us. Except for such additional information, we believe there have been no material changes from the risk factors previously disclosed in our Form 10-K.

The COVID-19 outbreak has adversely affected and could in the future continue to adversely affect our business.

The COVID-19 pandemic is adversely affecting, and is expected to continue to adversely affect, our operations, supply chains and distribution systems, and we have experienced and expect to continue to experience unpredictable reductions in demand for certain of our products and services, particularly in the aviation aftermarket. The global aviation market is experiencing a significant decline, specifically in global commercial air travel, which is having a significant impact on the parts distribution and maintenance, repair and overhaul services markets supporting general aviation and commercial aircraft. We expect international and domestic commercial airline demand and spending to worsen for a prolonged period of time.

We operate numerous "touch labor" warehouse and maintenance facilities supporting each of our three business segments both in our own facilities and customer facilities. A local outbreak of the virus in any of these facilities could temporarily shut down operations at those facilities until they have been thoroughly cleaned. Employees who become exposed to the virus would need to be quarantined and would be unable to work for fourteen days or longer. Similarly, customers who have warehouse or maintenance facilities could be impacted, slowing or reducing demand for our parts distribution services.

Furthermore, as a result of COVID-19, some of our commercial customers in the Aviation segment have been and could continue to be negatively impacted as a result of disruption in demand, which has led to delays and could lead to defaults on collections of receivables from them. Such continued delays could negatively impact our business, results of operations and financial condition.

The impact of the COVID-19 pandemic continues to evolve, and while we expect it to have an adverse effect on our business, financial condition, liquidity, cash flow and results of operations, we are unable to predict the extent, nature or duration of these impacts at this time, although we expect such negative impacts for the remainder of the fiscal year and perhaps longer.

As a result of the disruptions caused by the COVID-19 global pandemic, if we are unable to re-commence normal operations in the near-term, we may be out of compliance with the financial covenants in our debt facility.

We have a loan agreement with a bank group comprised of ten banks. Under the terms of our debt facility, we are required to maintain certain financial covenants. As a result of the COVID-19 global pandemic, our business operations have been and could be further disrupted and if we are unable to re-commence normal operations in the near term, we may be not be able to satisfy our financial covenant requirements. We are working with our bank group to mitigate this circumstance, which may result in waivers, consents, modifications, amendments, extensions, or other changes to the facility. There can be no assurance that we would be able to obtain future changes in a timely manner, on acceptable terms, or at all. If we were not able to obtain satisfactory changes to the debt facility, we could be in default, which could trigger an acceleration of repayment provisions that we would be unable to meet and would impair our ability to operate our businesses. If we make changes, it may lead to fees, increased costs, increased interest rates, additional restrictive covenants and other available lender protections that would be applicable to us under the debt facility.

The COVID-19 outbreak has adversely impacted our global supply chain network, which could result in significant shipping delays and a material reduction of available products.

We have experienced and expect to experience continued delays throughout our global supply chain network, both with respect to reduced available products and delays in shipping both domestically and internationally. Concerns regarding and measures implemented in response to pandemics of infectious disease have and could further cause changes in global supply chain network patterns, negatively influencing demand and availability of products. China has also limited the shipment of products through its borders which have negatively impact our ability to receive certain products flowing through that region. At this point, the extent to which COVID-19 may continue to impact our global supply chain network is uncertain, but continued disruptions could have a material adverse effect on our business, financial condition and results of operations.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

We did not purchase any of our equity securities during the period covered by this report.

VSE's loan agreement prohibits VSE from paying cash dividends, except that if there is no event of default, no act, event or condition that would constitute an event of default with the giving of notice or the passage of time, or both, and no covenant breach would occur giving effect to the payment of the dividend, VSE may pay cash dividends that do not exceed \$6 million in the aggregate in any fiscal year.

I, John A. Cuomo, certify that:

- I have reviewed this report on Form 10-Q of VSE Corporation (the "Registrant");
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the Registrant as of, and for, the periods presented in this report;
- 4. The Registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the Registrant and have:
- (a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the Registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
- (b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
- (c) evaluated the effectiveness of the Registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
- (d) disclosed in this report any change in the Registrant's internal control over financial reporting that occurred during the Registrant's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Registrant's internal control over financial reporting; and
- 5. The Registrant's other certifying officers and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the Registrant's auditors and the audit committee of Registrant's Board of Directors (or persons performing the equivalent function):
- (a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the Registrant's ability to record, process, summarize and report financial information; and
- (b) any fraud, whether or not material, that involves management or other employees who have a significant role in the Registrant's internal control over financial reporting.
